CAREER OBJECTIVE

Motivated Computer Science undergraduate with a strong foundation in Java, Object-Oriented Programming, DBMS, and MySQL. Experienced in developing real-world applications through academic projects and hackathons. Passionate about software development, problem-solving, and building scalable, efficient solutions while continuously learning new technologies and contributing effectively in a collaborative team environment.

TECHNICAL SKILLS

Languages: Java, Python (Basics), C (Basics)

Frontend: HTML, CSS, JavaScript, React

Backend: Spring Boot

Databases: MySQL, MongoDB

Tools: Git, GitHub, VS Code

Concepts: DBMS, OOP, Web Development

Cloud: AWS (EC2, VPC, IAM, S3)

PROJECTS

Spacentra – A Coworking Space Booking Platform

Technologies: React.js (JavaScript), Java (Spring Boot), MongoDB, Google Maps API, Gemini API

- Built a full-stack, multi-role coworking space marketplace connecting startups with space owners, supporting real-time seat-level availability, direct booking, and price negotiation.
- Developed an AI-powered negotiation chatbot using the Gemini API, with server-side enforcement ensuring negotiated prices never fall below the owner-defined floor price.
- Integrated Google Maps API for location-based space discovery and listing, including address autocomplete and map-based search.
- Designed role-based access control (Owner, Startup, Floor Manager) with JWT authentication and MongoDB-backed booking, complaint, and negotiation workflows.

CITA 2K26 – Event Management Website

Technologies: React.js, MongoDB, Java (Spring Boot), HTML/CSS/JavaScript

- Built a full-stack event management website for a college fest using React.js for the frontend and Java (Spring Boot) with MongoDB for backend services.
- Implemented features for event listing, online registration, and participation tracking, managing 100+ registrations.
- Designed a responsive, user-friendly interface using React.js and JavaScript.
- Structured backend logic for managing event and admin data.

AWS Cloud Infrastructure – Bastion Host Setup

Technologies: AWS (EC2, VPC, IAM, Security Groups, SSH)

- Designed and configured a secure AWS cloud environment using EC2, VPC, IAM, Security Groups, and SSH access.
- Implemented a Bastion Host architecture to securely manage SSH access to private EC2 instances within a VPC.

EDUCATION

B.Tech – Computer Science Engineering – MITS | 2023–2027

CGPA: 9.33

Intermediate – Sri Siddhartha Junior College | 2021–2023

98.3%

Matriculation – A.P. Model School | 2020–2021

96%

ACHIEVEMENTS & CERTIFICATIONS

- Oracle AWS Certification
- Top 20 Position, Makeathon 2025
- AWS Cloud Practitioner Essentials – Course Completion Certificate
- First Prize, Quiz Competition – GMOCS National Technical Event
- Participant, Smart India Hackathon 2024 (Institute Level) and Technoverse Hackathon
